

CONFLICT OF INTEREST AND GUARANTOR DISCLOSURE FORM

It is the policy of the Journal *Insights into Imaging* to ensure balance, independence, objectivity, and scientific rigor in the Journal. All authors are expected to disclose to the readers any real or apparent conflict(s) of interest that may have a direct bearing on the subject matter of the article.

This pertains to relationships (remunerated or not) with pharmaceutical companies, biomedical device manufacturers or other corporations whose products or services may be related to the subject matter of the article. In particular, authors must acknowledge those companies who have supported the Department(s) where the work was carried out or may have sponsored the study in any way.

The intent of the policy is not to prevent authors with a potential conflict of interest from publication. It is merely intended that any potential conflict should be identified openly so that the readers may form their own judgements about the article with the full disclosure of the facts. It is for the readers to determine whether the authors' outside interest may reflect a possible bias in either the exposition or the conclusions presented.

The corresponding author will complete and submit this form to the Editor-in-Chief on behalf of all authors listed below.
